Custom printed cups | Artwork guide

LOCAL PREVIEW - Draft for AuraPack review - October 7, 2026

Choose your cup

Select 6 oz or 10 oz before positioning your artwork. The source drawing labeled 8 oz is identified by AuraPack as its 6 oz cup. Manufacturing drawings are reference documents, not approved artwork templates.

Prepare your artwork

Use a clear PNG or JPG, up to 15 MB, for this preview. Transparent PNG works well for logos. Keep your original vector artwork or print-quality PDF for the sales team. Aim for 300 dpi at the final print size; the preview is not a print-resolution check.

Full wrap or centered logo

Full cup wrap fills the surface and may crop the image edges. Choose Centered logo to keep the whole image visible. Adjust size, position, angle and background, then rotate the cup to review all sides.

Check the print boundaries

Keep logos and important text away from the rim, bottom fold and side seam. Ask AuraPack for the approved bleed, safe area, seam allowance and color specifications before preparing production artwork. Drawing dimensions alone do not define these requirements.

Send a complete inquiry

Save the preview and email it with your original artwork, cup size, quantity, delivery destination and preferred date. The email button opens your mail app; attach files manually. Pricing, minimum quantities and timing are confirmed in a written quote.

LOCAL PREVIEW - Draft for AuraPack review - October 7, 2026

Artwork ownership

Submit only artwork you own or have permission to reproduce, including logos, photographs and trademarks. Tell AuraPack about any restrictions on its use.

Preview and color accuracy

The online cup preview is a visual approximation. Screen colors, crop, scale, seam placement and paper appearance may differ from the finished cup. A saved image or this PDF is not an approved production proof.

Proof approval

Review the final artwork proof for spelling, artwork, layout, cup size and colors. Production details and approval requirements must be confirmed in writing with AuraPack before manufacturing.

Quotes and orders

A design upload or quote inquiry does not place an order. Price, minimum order quantity, payment, shipping and production timing are established in the written quote and order confirmation.

Changes, cancellation and concerns

Request revisions or cancellation promptly. Feasibility and any charges depend on the production stage and written order terms. Contact the sales team with order or print-quality concerns; no automatic refund or cancellation policy is stated here.

Local preview and files

In this local prototype, artwork is processed in your browser and is not uploaded to AuraPack. Downloaded previews remain on your device. If you email files, they are sent through your email service to the sales team.

Draft status

These are draft custom-print conditions for AuraPack review, not finalized general terms of sale. Applicable order terms must be supplied with the quote. Confirm the seller legal name and commercial policies before publishing.
